SUPPLEMENT TO
REPORT NO.

SUBJECT The Eliseina Copper Mine

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF U.S.C. 81 AND 82, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The Eliseina copper mine is situated 1,500 meters northwest of the Eliseina railway station in the Isker Pass. A cable railway, equipped with small containers carrying a ton of material, joins the mine to the foundries which are situated on the right bank of the Isker River.
2. The mine produces one ton of 90 percent pure copper per day plus five tons of industrial copper.
3. Most of the production was formerly sent to the Soviet Union. This was because the mine was formerly a German enterprise with German capital and the Soviets took over all German assets. In the last year, however, the copper has not been exported to the Soviet Union.
4. Although the Eliseina mine has a power station of its own capable of generating 1,000 kilowatts, it is at present receiving its power from Kurilova. The eventual plan is for Eliseina to be supplied with electric current from Mezdra.
